**From Auto Parts to Titanium Surgical Screws: All in a Day's Work  
for Scorpion Performance, Inc.**

*"Scorpion Performance Maximizes facilities to keep product lines diverse."*

FT. LAUDERDALE, FL – July 1, 2007 - The Wright brothers operated a bicycle shop in Dayton, OH that over time led to the first successful heavier-than-air "bicycle with wings" – and spawned an enormous industry.

In a somewhat parallel example, a South Florida manufacturer of aftermarket auto parts is finding itself producing small parts for the burgeoning medical equipment industry.

Scorpion Performance, Inc. is widely known in the high performance automobile industry for its rocker arms and related high-precision parts. Before most Scorpion parts leave the shipping department, they are treated to a highly polished "jewel-like" finish -- then are anodized in one of several distinctive colors – red, purple, blue, gold and clear. The anodizing process not only adds a touch of glamour to an otherwise mundane chunk of aluminum or steel, but adds a very thin protective coating to the part.

This process of bringing a bit of "charm" to ordinary metal parts is now appealing to manufacturers outside of the auto industry. A series of companies who manufacture medical equipment are seeking Scorpion's anodizing services to add luster to many of their parts. One result has been the creation of a subsidiary, Anodizing LLC, to deal with these outside firms.

The more significant result of this activity is Scorpion's decision to manufacture medical equipment parts themselves – as well as anodize them.

The company's existing array of robotically-controlled machine tools are ideally suited to manufacture hundreds of various parts for the medical industry – right down to producing titanium screws for surgical operations. If medical companies should be interested in gold-anodized titanium surgical screws – Scorpion can produce them at more attractive prices because of its highly efficient tooling.

Scorpion prides itself on its ability to re-engineer small precision parts used by any industry – and turn them out in greater volume at lower prices – given its commitment to operating the finest machine tools available.

Having adopted the slogan: “Made in America & Proud of It,” Scorpion welcomes comparisons on quality, price and delivery with any overseas supplier.

### **About Scorpion Performance**

Scorpion Performance Inc. is an authority in high-performance racing engine parts. Race enthusiasts have proven internationally that Scorpion Performance Inc has achieved incredible milestones through advanced technology. Scorpion Performance Inc is the leading manufacturer of rocker arms in the U.S.
