Scorpion Rockers are now the Industry Standard – in Quality & Price!

“Scorpion Performance rocker arms set new standard. ”

FT. LAUDERDALE, FL – July 4, 2007 - Ft. Lauderdale, FL – The nation’s leading rocker arm manufacturer – Scorpion Performance, Inc. – insists its LS1-LS6 Roller Rocker Arms are the very best your money can buy. Not only that, states Scorpion Founder Rob Stopanio, it is the one line of rockers that buyers can be certain are Made in America.

“Our roller rocker arms are lightweight, assuring even greater horsepower, and they are the quietest rocker on the market,” claims Stopanio. “They are the only Direct Bolt-on rockers in production. That means no changing of pushrods, guideplates, rocker studs or valve covers are required. With these advantages, the self-taught home garage tech can truly install these rockers on his own.”

Scorpion leads the industry in its highly sophisticated robotically controlled manufacturing methods, assuring parts of greater precision. And the sheer production efficiencies these machine tools deliver make it possible for the company to price its Scorpion-branded rockers very attractively, very competitively.

Scorpion products, Stopanio points out, are “Made in America & Proud of It!” So if you take pride in treating your performance engine to “The Best,” as well as take personal pride in “Buying American,” then you can settle for nothing less than the Scorpion brand. The company backs its products with its new Lifetime Guarantee, unlike the short-term warranties offered by the competition.

Scorpion Performance is eager to be compared with imported lines of rockers – or any in the world -- on the basis of quality and price. Borrowing a phrase from Lee Iacocca, Stopanio says: “If you can find better quality at a better price, then buy it!”
